

PIFIS

University: Corvinus

Program: MSc in Regional and Environmental Economic Studies

Preparatory Price: 5500€ in total

Entry requirements to preparatory program: English level: min. A2,
Good high school grades

MSc Description: Regional and Environmental Economics is a practice-oriented programme that will mould you into a specialist with unique skills sought by employers.

You will study the latest trends in urban, regional and rural development that can shift the environmental issues we are facing today. You will develop a critical approach to the present worldwide challenges, such as decarbonisation and climate neutrality or the impact of depleting non-renewable resources. You'll gain a deep understanding of the connection between major economic decisions taken and their possible impact on our ecosystem.

The professors are distinguished practitioners and experienced academics. You will also hear from international guest lecturers and business leaders in Hungary about how development policy planning works; how can sustainability be achieved in the corporate world; and how innovative economic decisions can aid society in the fight against climate change.

For admission onto the Regional and Environmental Economic Studies programme, you will typically hold an economics, agricultural or business-related degree. We accept applicants from other academic backgrounds who meet the compulsory credit requirements stated below.

Entry requirements to MSc program: Min. 785 points on the final TOEIC exam
Passing the oral entrance exams
BSc/BA diploma from a relevant field
